

Matheus Siqueira

Full Stack Developer | Python | Django | React.js

Rio de Janeiro, Brazil | +55 21 98332-5929 | matheuspontessiqueira@gmail.com | LinkedIn: linkedin.com/in/matheuspsiqueira | GitHub: github.com/matheuspsiqueira | Portfolio: matheuspsiqueira.github.io/Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications using Python, Django, and React.js. Skilled in developing REST APIs, automating internal processes, and building internal systems with direct impact on business operations. Working knowledge of frontend development with JavaScript and React.js, including building reusable components and integrating with REST APIs. Background in IT infrastructure and information security, working across Linux and Windows environments.

PROFESSIONAL EXPERIENCE

IT Support Assistant — Eletrodata Engenharia, Rio de Janeiro *Oct 2024 – Feb 2026*

- Developed Python automation tools that streamlined internal document and data processing workflows
- Built a corporate intranet system from the ground up using Django, including user authentication and access control
- Integrated internal systems to support cross-department operational workflows
- Administered Active Directory users, groups, and permissions in a corporate environment
- Provided Tier 1/2 technical support and maintained Windows and Linux server environments
- Documented technical solutions and internal procedures for long-term maintainability

IT Intern — Eletrodata Engenharia, Rio de Janeiro *Jan 2024 – Oct 2024*

- Resolved technical support tickets and assisted end users in a corporate environment
- Installed and configured operating systems and business software
- Supported basic network and IT infrastructure administration

KEY PROJECTS

Document Automation Tool (Python)

- Built an automation script to classify and organize PDF documents, applied across 100+ employees
- Reduced manual document-organization time significantly, freeing staff for higher-value work

Corporate Intranet System (Django)

- Designed and developed an internal web platform for announcements, documents, and internal communication
- Implemented authentication and role-based access control restricted to the IT team
- Integrated with internal systems via API to notify staff of system outages

AppUnited — Full Stack (Django REST Framework + React Native)

- Built a REST API with JWT-based authentication using Django REST Framework
- Designed and structured API endpoints for user management and internal workflows
- Contributed to frontend components and API consumption using React Native and JavaScript

EDUCATION

- Bachelor's Degree in Systems Analysis and Development (in progress) — Unicesumar, Brazil — expected completion July 2026
- IT Technician Diploma — Senac, Brazil — completed December 2023

ADDITIONAL TRAINING

- Offensive Security Fundamentals — Alura
- Web Application Penetration Testing — Alura
- Introduction to Hacking and Penetration Testing — Solyd
- TDD with Django — Alura
- Authentication in Django — Alura

TECHNICAL SKILLS

Python, Django, Django REST Framework, React.js, React Native, JavaScript, REST APIs, JWT Authentication, PostgreSQL, SQLite, Git, Linux, Windows Server, Active Directory, Bootstrap, Process Automation
